

ACKROBAT PROFESIONAL SRL

Company

presentation

Object of activity

Our company provides professional high-class services with the help of our professional team and the most advanced technological solutions available in the industry, accompanied by ISO certifications.

Ackrobat Profesional SRL. offers services in the field of **cleaning industrial facades and glass surfaces** in great heights by means of **professional climbers** and hydraulic lifting platforms for surfaces which are hard to reach.

We use the latest equipment in the industry, internationally certified equipment and machines.

Ackrobat Profesional SRL. specializes in **cleaning and polishing operations for glass surfaces and Alucobond**, either plastered or painted or covered with polyurethane foam, etc.

Our customers both inland and abroad confirm our high class services performed in great height by specialized climbers, so that the quality of our services is **ISO certified** and the **A1** certificates also confirm our standing collaboration of 3 years with our partners in EU Member States.

By using the latest technology and professional equipment **for professional climbing** we are able to reduce both costs and duration of the work contractually agreed with our customers.

We provide high quality services, according with the valid protection standards, the responsibility for occupational safety and prevention of work accidents entirely assumed by **SC Ackrobat Profesional SRL**, according to the Employment Protection Agreement annexed to this contract.
